

OTA update procedure – Allview P4 Life/ 12.06.2015

The benefits of software updating are:

- ✓ *Improvement of software stability;*
- ✓ *Improvement of translations;*
- ✓ *Correction of minor bugs.*

ATTENTION! When starting the procedure, the phone should be fully charged.

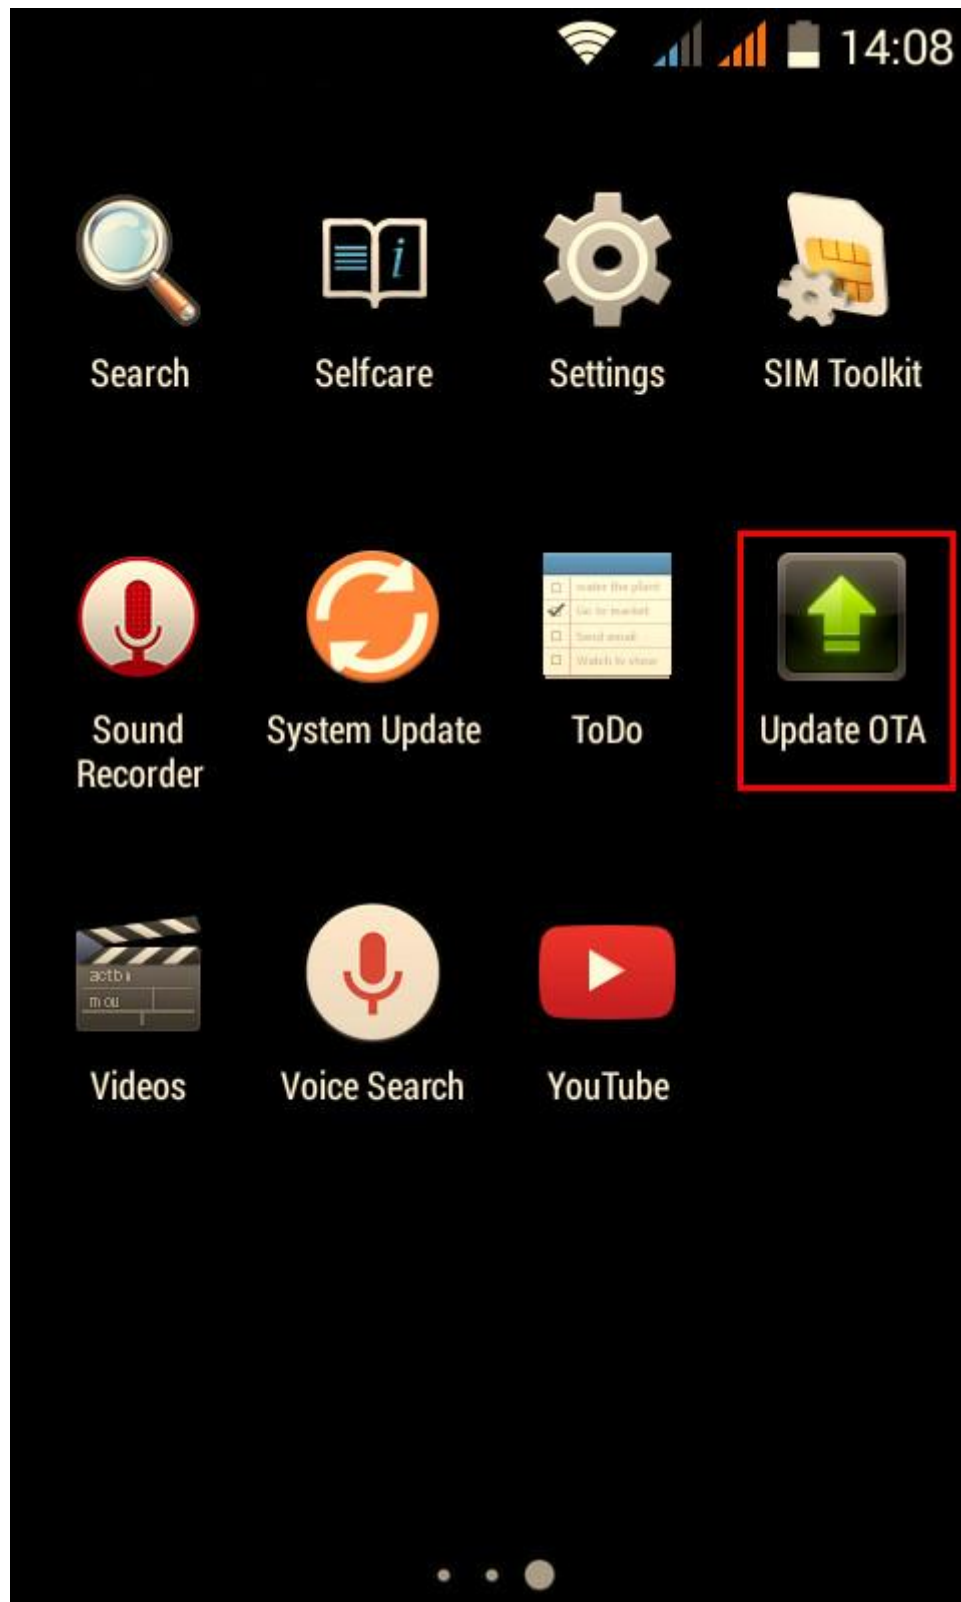

ATTENTION! You must not interrupt the updating in any way.

Software updating shall be performed on one's own risk, by accurately following the steps below.

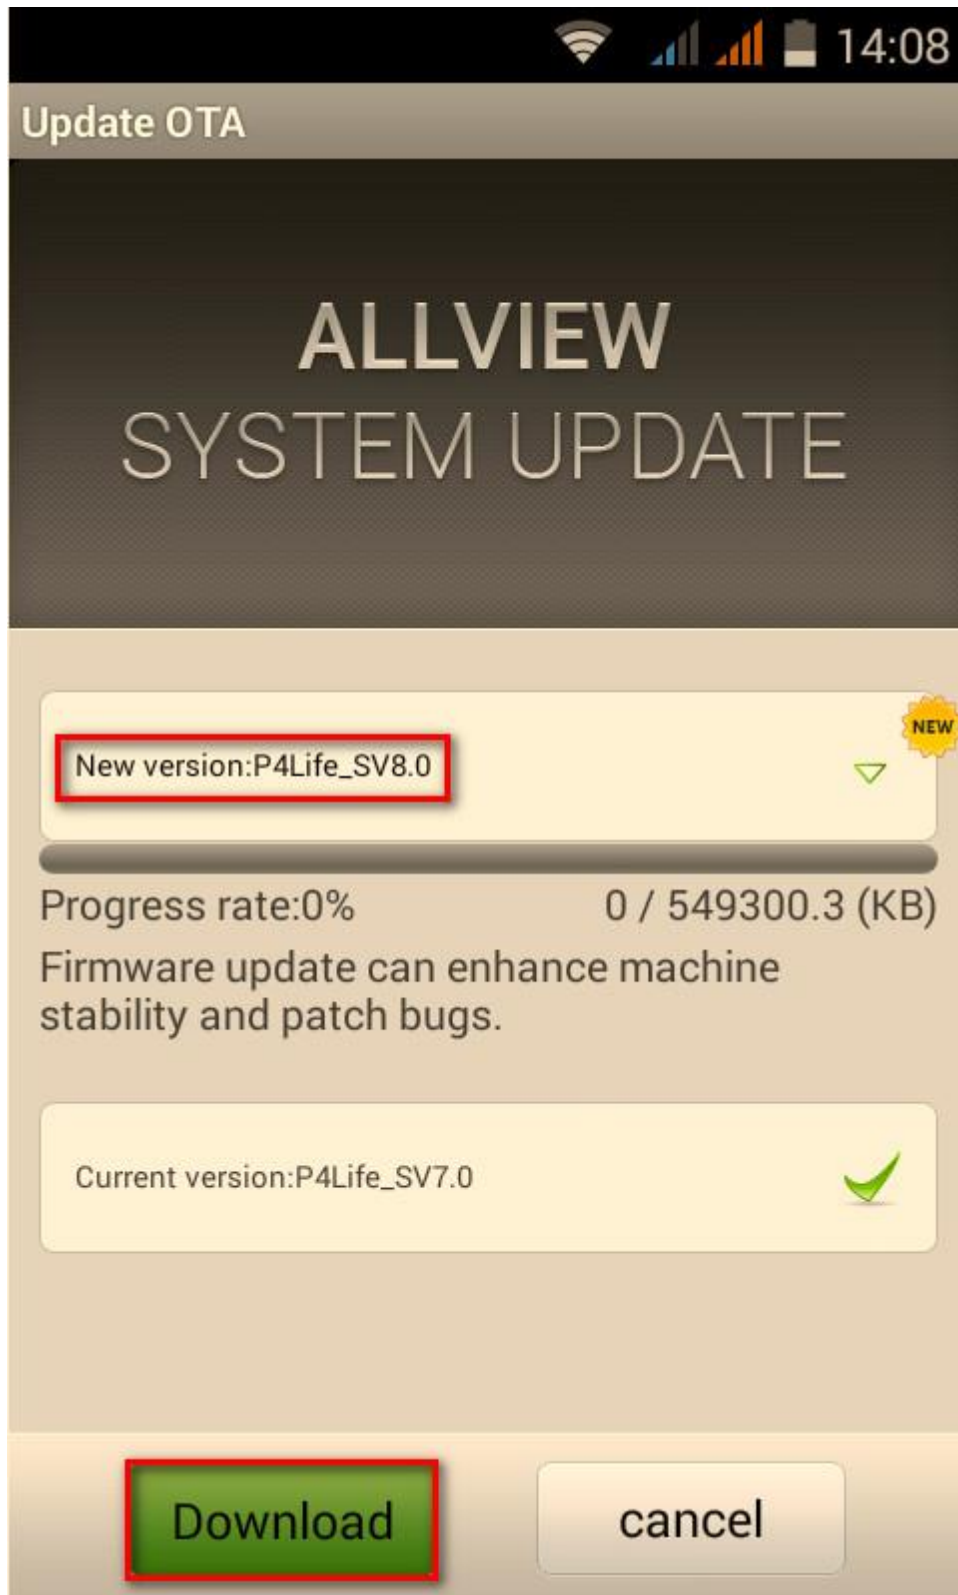

To update the Android operating system of your **Allview P4 Life** smartphone to the latest software version available, please follow the steps below:

1. Start the phone and connect it to a **Wireless** network.
2. **“System updates”** application will open from the Applications menu:

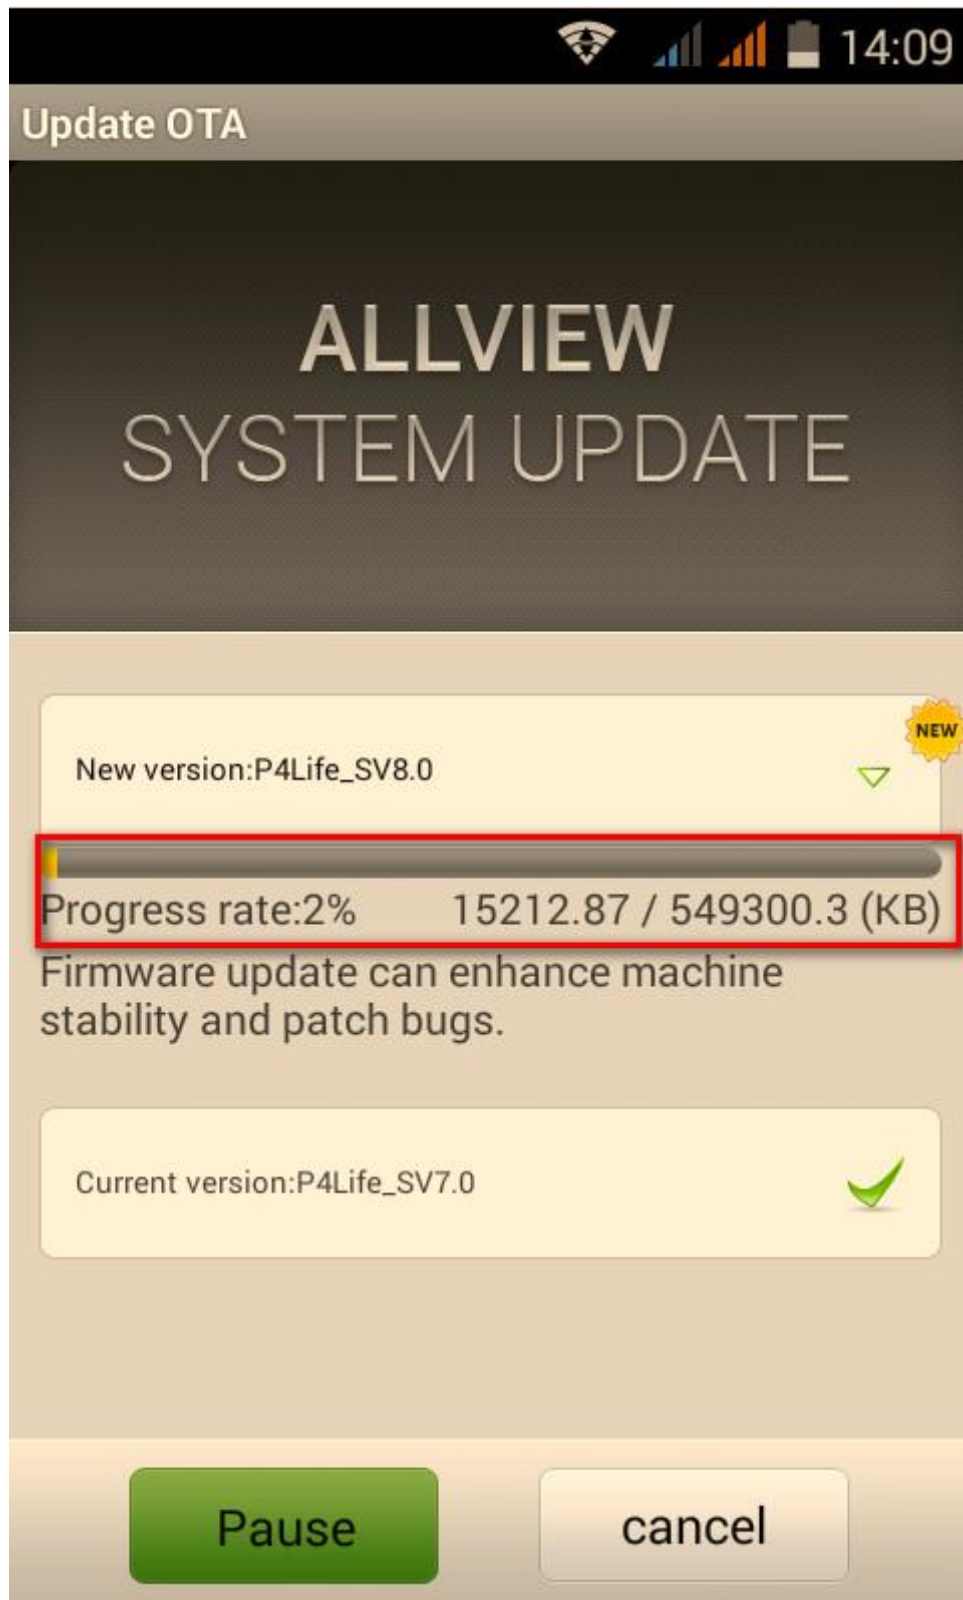

3. “**System updates**” application has detected a new software version (SV8.0). **Download** option will be checked:

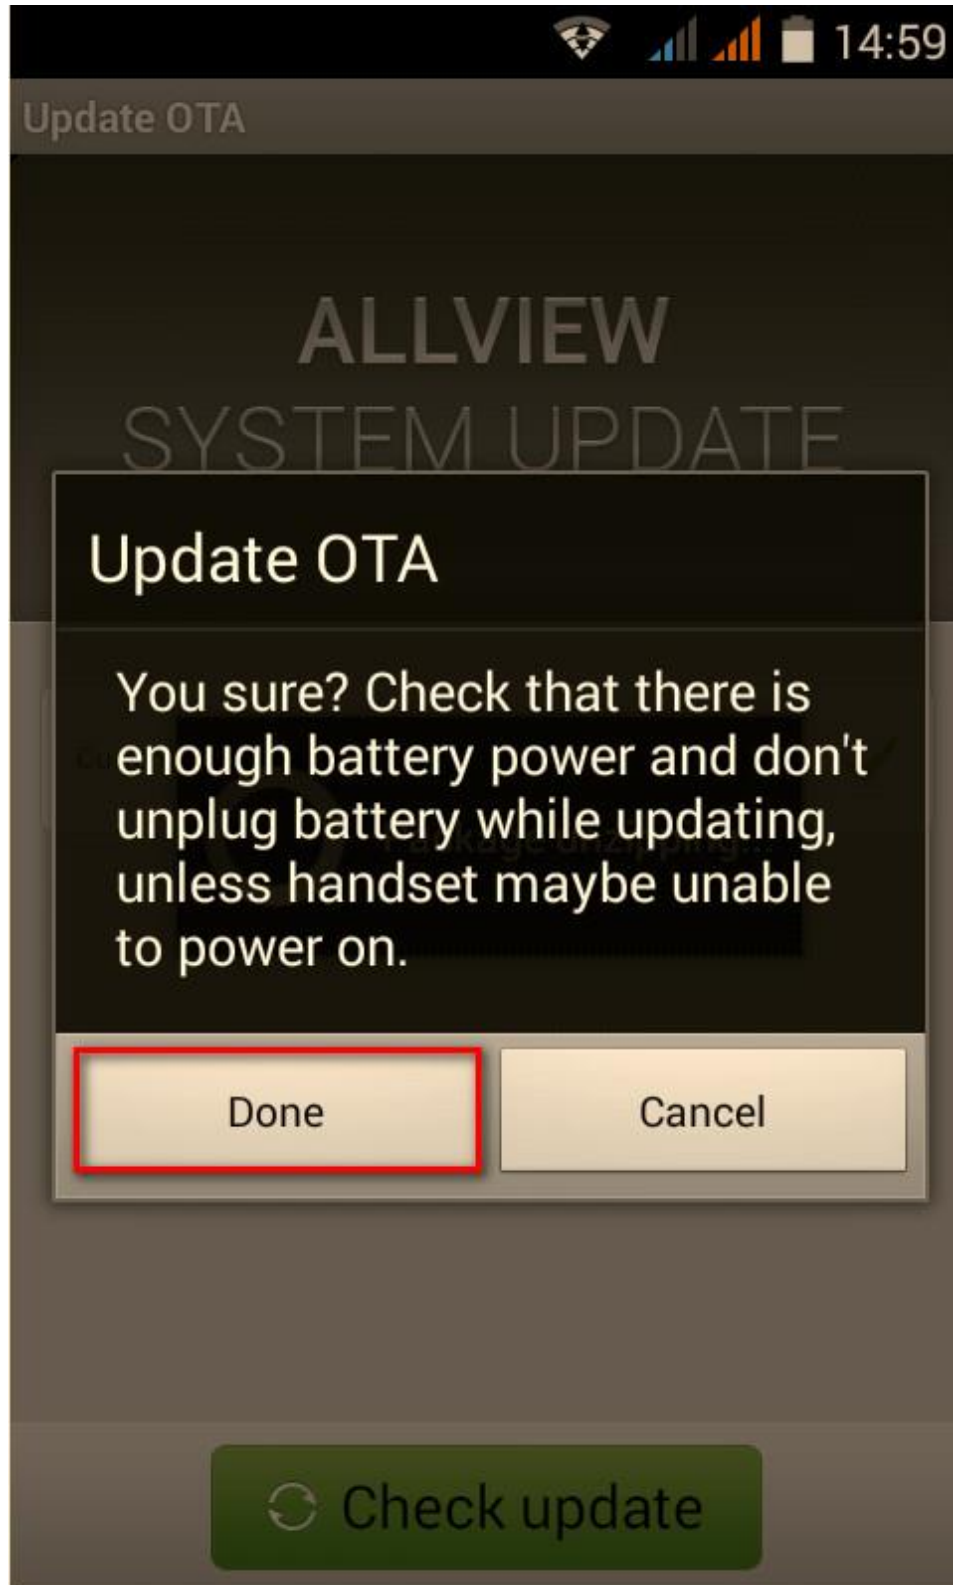

4. The download of the software update file into the internal memory of the phone is pending:

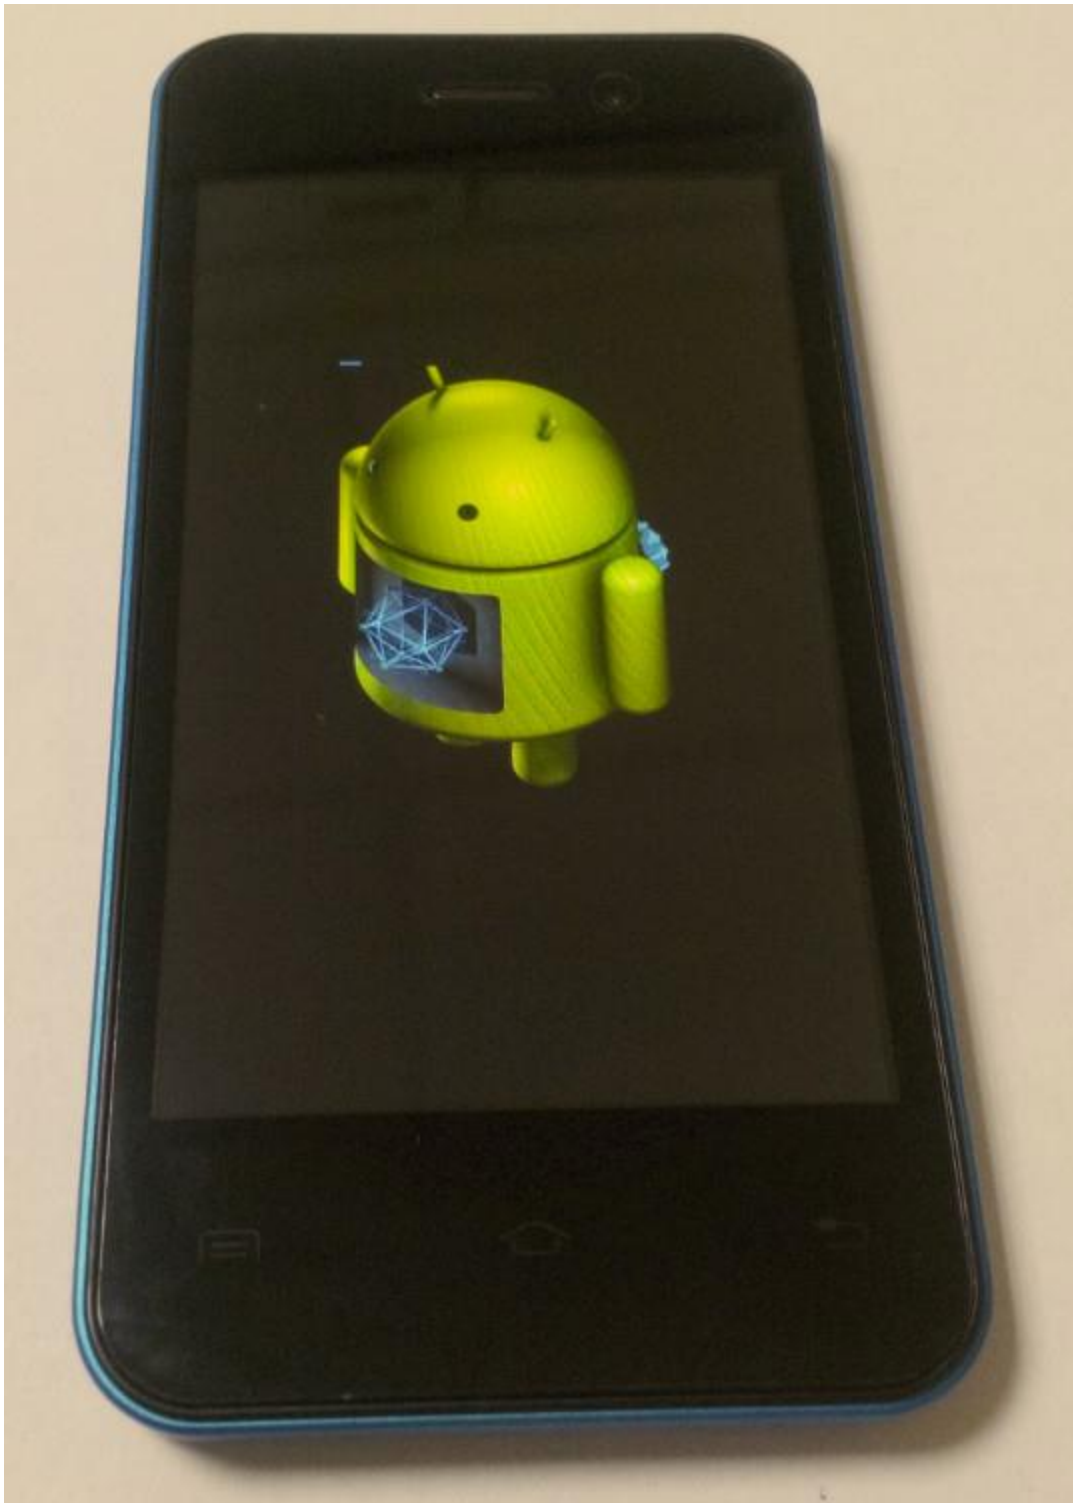

5. When the update file is fully downloaded in the internal memory, a prompt will pop up on the phone screen, informing you on the update:

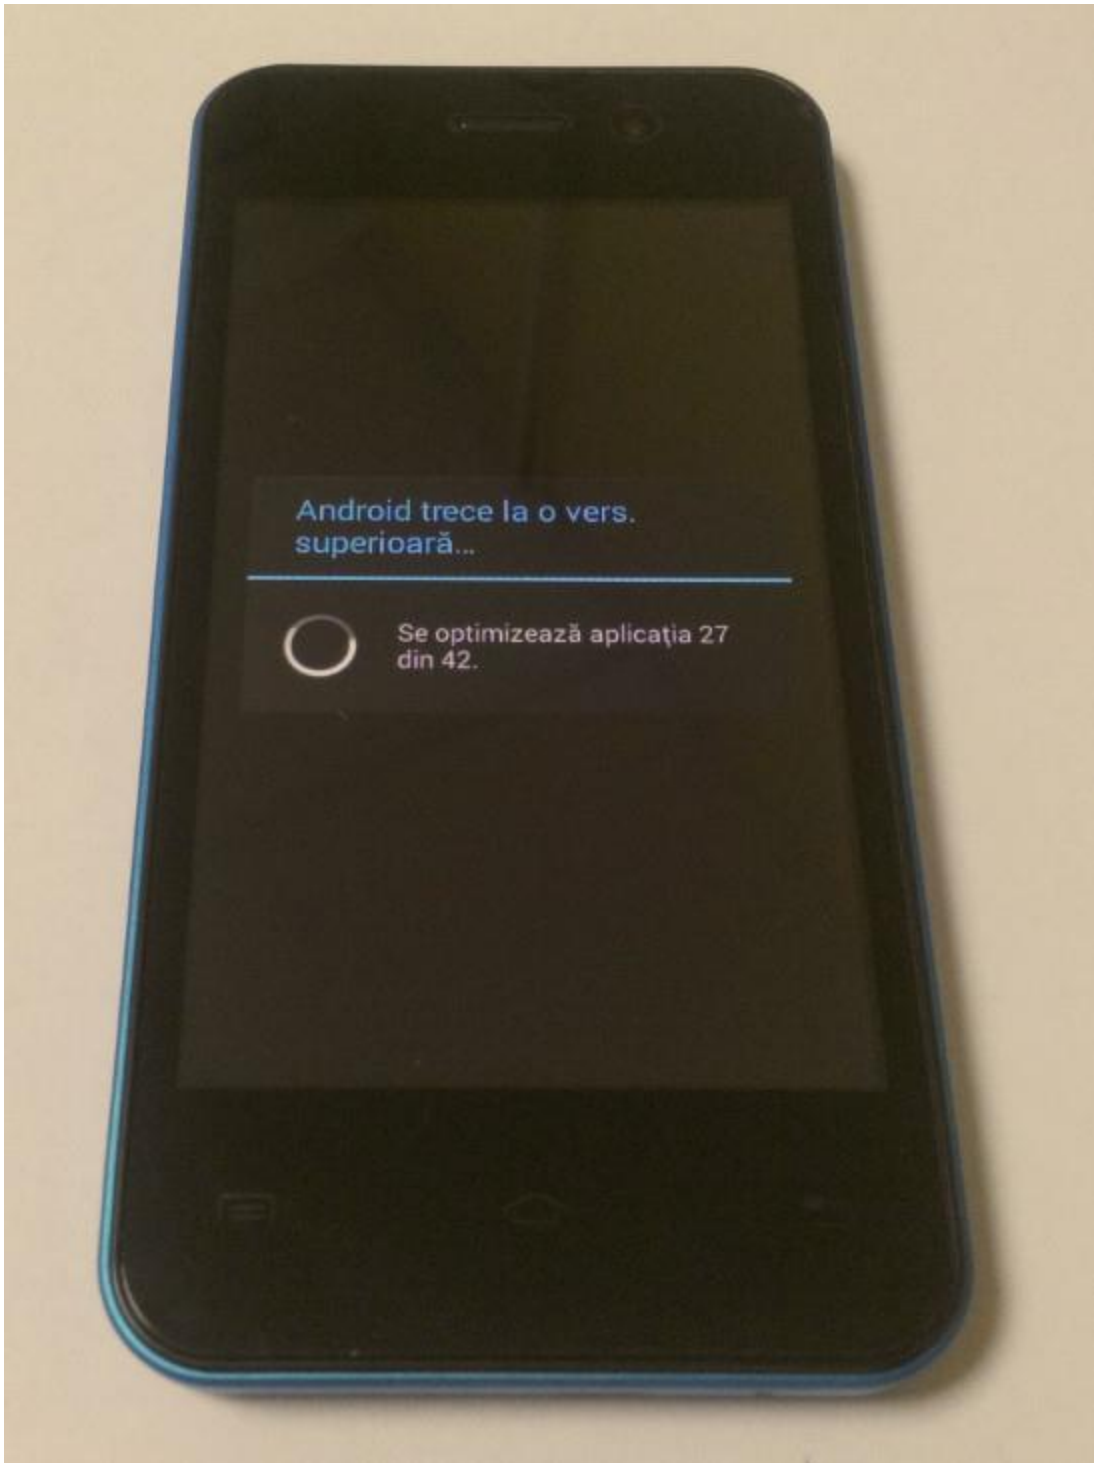

6. Select **Done**. The phone will restart and will automatically start the updating.

7. After ending the software updating, the phone will restart.

8. The prompt “**Android is upgrading**” will pop up on the phone screen.

 *The update file downloaded in the internal memory / microSD card will be automatically deleted after the updating.*

 *To avoid any errors, we recommend Factory Reset after the updating.*

 **ATTENTION!** *Restoring the phone to the factory settings will lead to the full deletion of the personal information and applications installed on the phone.*
