

The update procedure through OTA – Allview AX501Q / Android 7.0 / 07.08.2017

The software update advantages are:

- ✓ self-improvement;
- ✓ fixing some minor bugs.

ATTENTION! Before installing the new update to Android 7.0, please copy important data from your tablet because it will be lost after the update operation. Some apps will disappear from the main screen and from the menu, so after the update, we recommend that you make a factory reset of your tablet for a more accurate operation.

ATTENTION! The tablet must be fully charged when initializing the procedure.

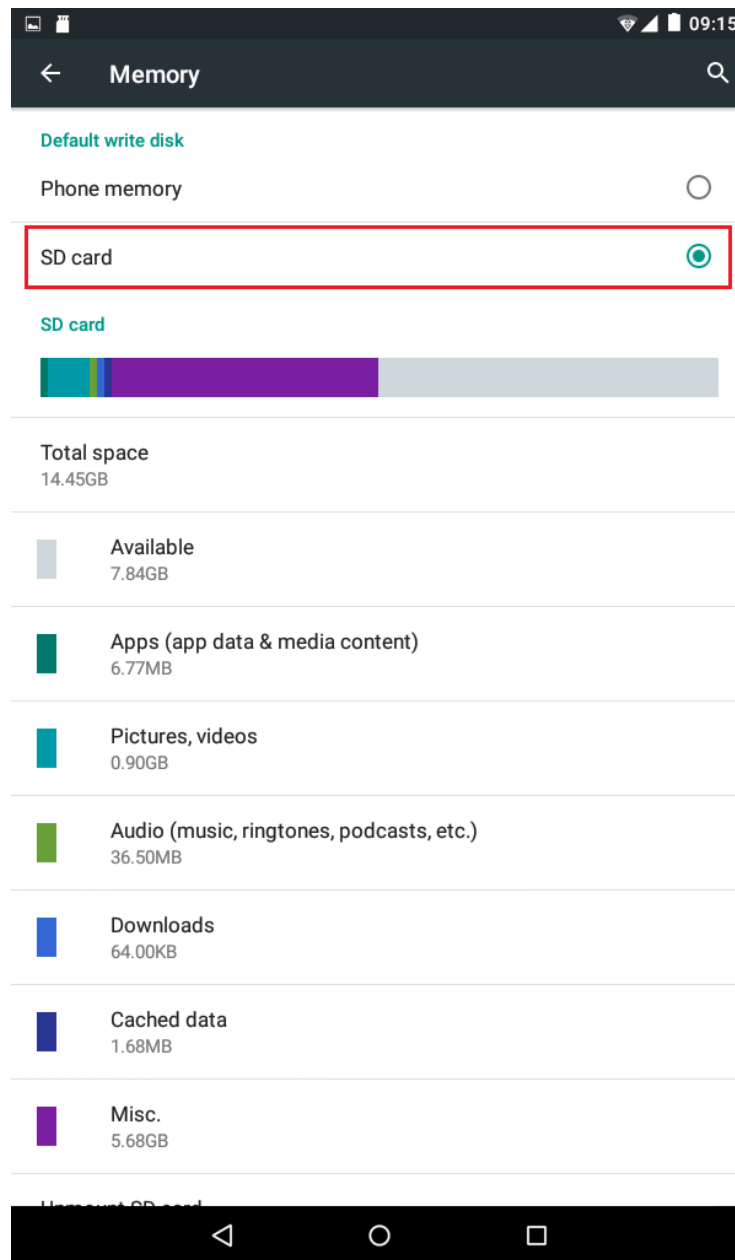

ATTENTION! Please do not stop the update operation under any circumstance. The software update is an operation made on own responsibility by following the steps below.

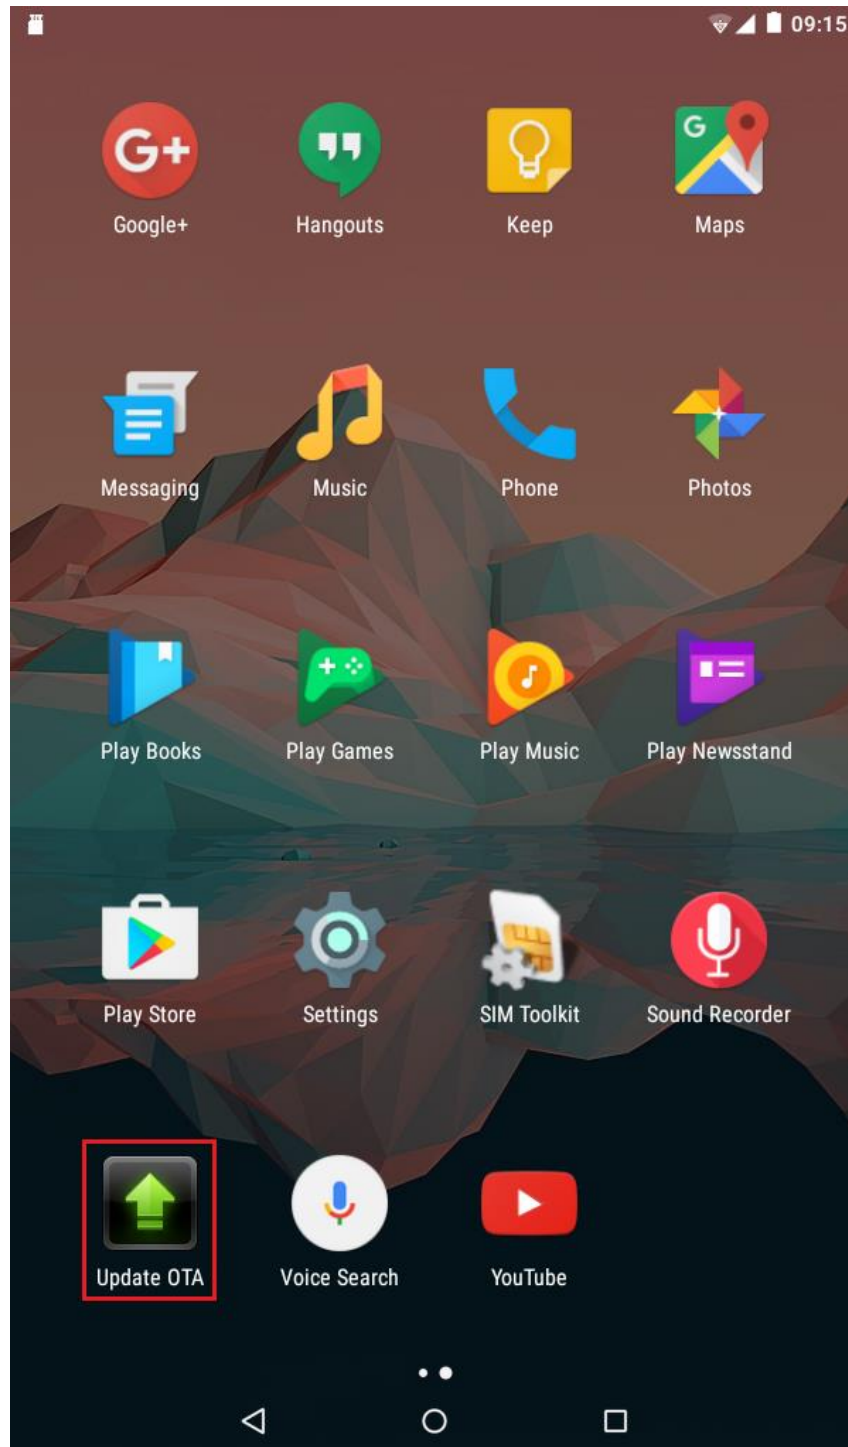

To update the software version of the *Allview AX501Q* tablet please follow the next steps:

1. Turn on the tablet and connect it to a wireless network.
2. Make sure you have the SD Card inserted in tablet and selected as the default location writing.

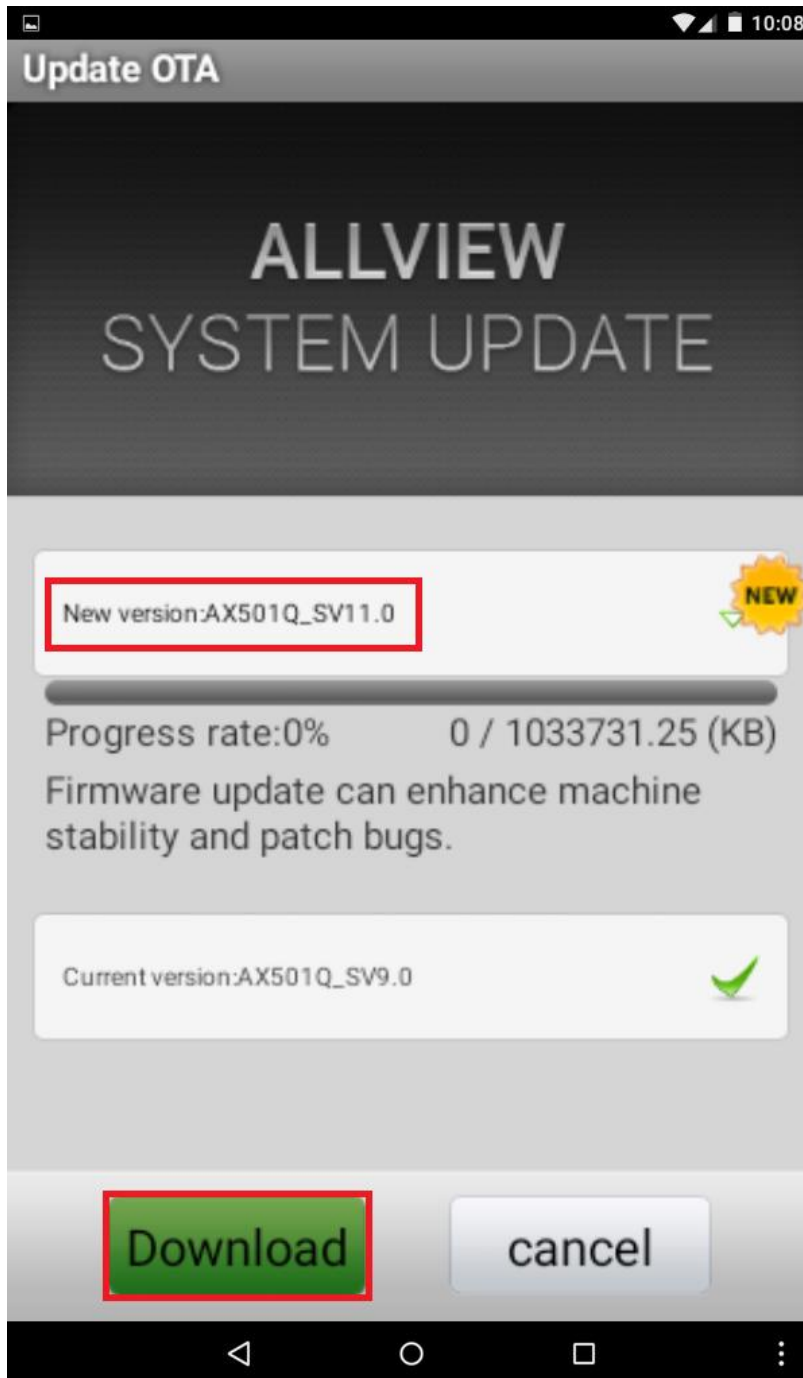

3. Open the "Update OTA" app from the apps menu:

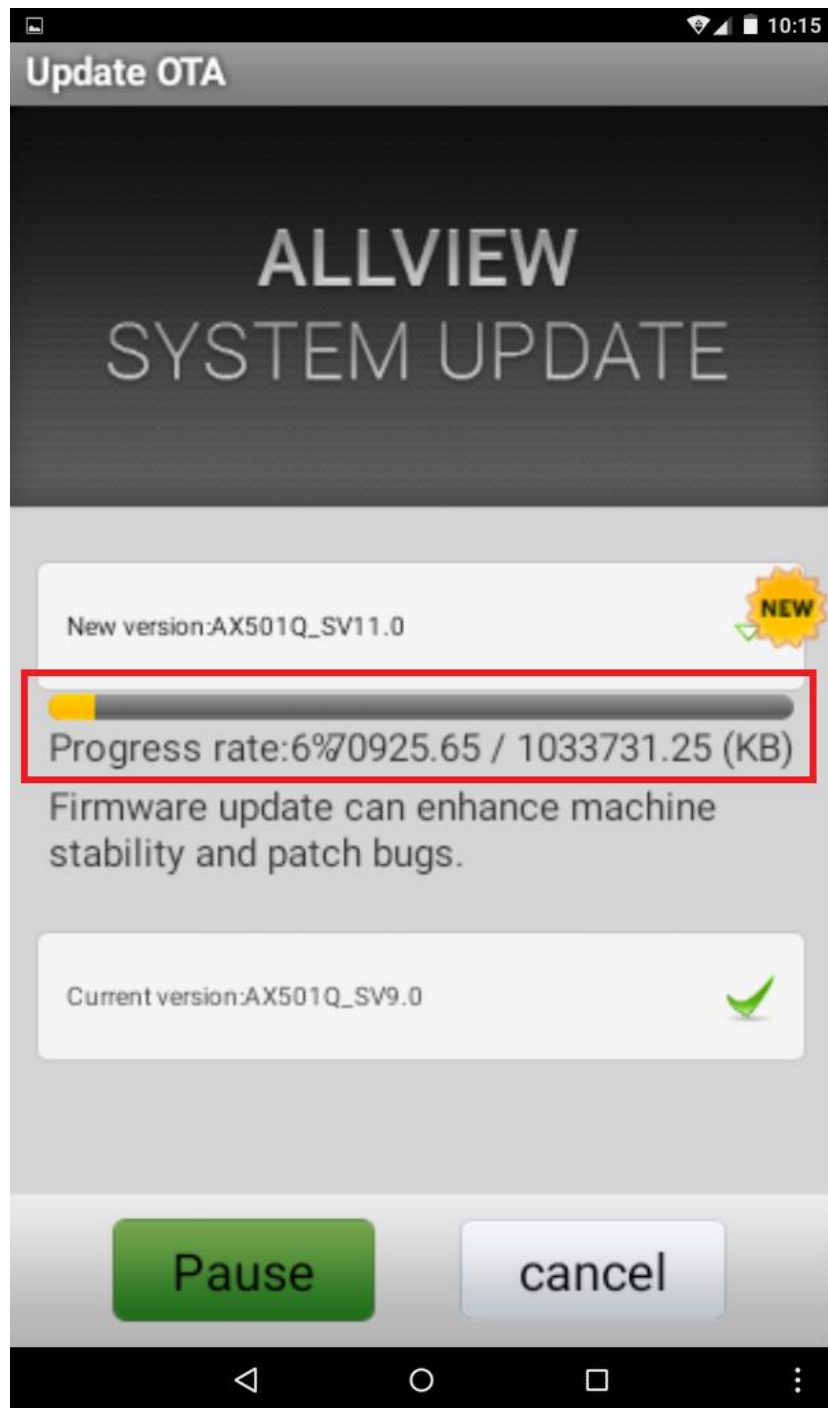

4. In “**Update OTA**” app check for new software version (**AX501Q_SV11.0**). Click on **Download**:

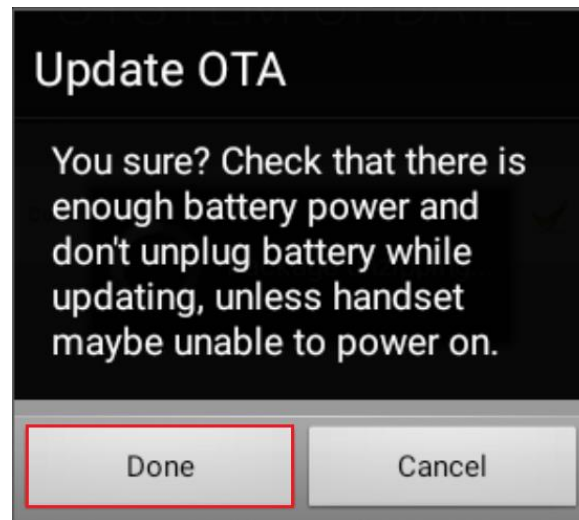

5. Please wait for the full software download in the table's storage (micro SD card).

6. After the full software download, a message that will inform you about this update will be displayed on the tablet's screen:

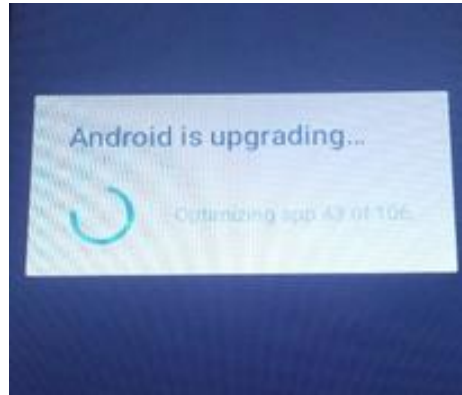

7. Select **Done**. The tablet will reboot and the update procedure will automatically start.

8. After finishing the update process, the tablet will reboot itself.

9. **“Android is upgrading”** message will be displayed on the tablet’s screen.

The update file downloaded in the tablet's storage (micro SD card) will be automatically deleted after the termination of the update process.
